Catalogue of Dahlias and Gladioli

Logan Dahlia Gardens, R. D. 5, Butler, Pa.

GREETINGS

We take great pleasure in presenting this, our 1930 catalogue of Dahlias and Gladioli.

We desire to thank our many customers for their patronage during the past years and for the many letters telling us of the wonderful results they had with our bulbs.

A cordial invitation is extended to our customers and friends to visit our gardens which are located six miles south of Butler on the Butler and Saxonburg Road.

**LOGAN DAHLIA GARDENS,
Route 5, Butler, Pa.**

INSTRUCTIONS—INFORMATION

ORDER EARLY. All orders received prior to January 1 for spring delivery will be subject to prices quoted in this catalogue, even though they have been reduced since the order was received. Do not delay ordering until planting time as you are almost certain to find some of the varieties you wanted are all sold.

SUBSTITUTION. Orders are filled with Field Grown Roots with varieties called for, and unless substitution is asked, we never substitute, but would suggest naming a second choice.

TIME OF SHIPMENT. Unless otherwise ordered, tubers will be shipped near May 1st by Parcel Post or Express.

TERMS: Please send money with order or in advance of shipment sufficient to cover the entire bill. We pay the postage on retail orders of \$1.00 and over accompanied by cash for the full amount. Bear in mind C. O. D. orders cost you extra for collection and M. O. fees, so kindly send money with your order and let us pay the postage. It is less trouble for both the customers and for us. In some instances the postmasters fail to send the money promptly to us. Some have been as long as two months, so we are trying to avoid C. O. D. orders.

GUARANTEE. We guarantee safe arrival of all roots. All roots are carefully marked, absolutely true to name. Remember we send out strong tubers, no green plants. Should a root properly planted fail to start a shoot in three or four weeks after planting, return it to us and we will cheerfully replace it at once, if possible; if we cannot we will refund the money. **IN ALL CASES BULBS TO BE REPLACED MUST BE RETURNED.**

REMITTANCES should be made by bank draft, post office money order or registered letter. Checks and money orders may be drawn to the order of the Logan Dahlia Gardens.

NAME AND ADDRESS. Remember to write your NAME, POST OFFICE, COUNTY and STATE; also give STREET NUMBER or P. O. BOX as plainly as possible.

HINTS ON GROWING GOOD DAHLIAS

IF BULBS ARE RECEIVED BEFORE IT IS CONVENIENT TO PLANT THEM, place in a shallow box of moist soil until time to plant outdoors. If roots become too dry it may kill the eyes. Handle roots carefully; if the necks are broken or crowns injured it may ruin the tuber.

Dahlias will grow in any good garden soil. An open, sunny location is best. They are usually planted from May 1 to June 10. The soil should be thoroughly pulverized to a considerable depth. BE SURE AND LAY THE TUBER FLAT, and plant about six inches deep and three or four feet apart. About one half pint of bone meal and a pint of sheep manure or some well-rotted manure may be mixed with the soil for each dahlia.

DO NOT FAIL TO CULTIVATE, AND CULTIVATE OFTEN. A little fertilizer may be added to the soil after buds have formed. Water thoroughly, to the depth of at least a foot, about twice a week after buds have formed. Keep all dead flowers trimmed off.

A splendid idea is to give the plants a good spraying or dusting with some nicotine preparation when the plants are about 8 inches high and spray several times during the summer whether they appear to be infested or not. Do not wait until serious damage is done. Sometimes borers work in the stalks, making them wilt. Slit the stalk with a pen knife below the hole where it entered; if the borer is not in that section, examine another, but do not cut the joints. If you are unable to find it, pour a solution of arsenate of lead into the stalk. Water for several days and stake the dahlia and in a few days it will be growing nicely again.

LIFTING AND STORING DAHLIA ROOTS

Three or four days after the frost has blackened the stalks, cut them down. Select a pleasant day for digging in a week or ten days after they are frosted. Dig very carefully so as not to break the neck of the tubers. Turn the clumps upside down and allow them to dry but two or three hours if your cellar is very dry, otherwise they should dry for a day.

If your cellar is very warm and dry carefully store clumps upside down in barrels which have been lined with newspapers. Cover barrels with burlap and examine the dahlias occasionally during the winter. Some place the clumps upside down on the concrete floor or in boxes and cover with about 8 inches of ordinary dry garden soil.

All clumps should be divided into several pieces before being reset the following spring.

ABBREVIATIONS USED

C.—Cactus—Long, narrow incurved or twisted petals with sharp points.

H. C.—Hybrid Cactus—Broader and more massive petals than the true cactus.

D.—Decorative—Large double flowers, full to the center, with somewhat broad and flat petals.

H. D.—Hybrid Decorative—Broader petals than Hybrid Cactus.

P.—Peony—One to three rows of long, flat or twisted petals with open yellow center.

Show—Closely quilled, ball shaped.

To those who are unacquainted with the different classes and varieties of Dahlias and Gladioli, you may leave the selection to us. Send us the amount of money you wish to invest and in return we will send you those which will surely delight. Also our liberal filling of the order will be more than satisfactory.
